Total from Table B1b			
TOTAL TONS MRA MATERIALS		tons	

- * 1 ton = 2000 pounds. To get tons if you have pounds divide the pounds by 2000 (*e.g.*, 4520 pounds/2000 = 2.26 tons).
- 1 The material must be composted or mulched and marketed! **Simply spreading a material on a field DOES NOT constitute a composted/mulched material and does not count as a recyclable material.** Composted/mulched material that ends up being disposed in a landfill does not count as a recyclable material.
 - 2 Consists of non-source-separated MSW materials (*i.e.*, trash).
 - 3 Includes recycling of wood products (*e.g.*, pallets, crates, barrels, wood furniture, canes, crutches, etc.). **Materials must be mulched or composted ONLY.** Otherwise, include in “Other Materials” category.
 - 4 Tires that are recycled into new products containing rubber (*e.g.*, trashcans, storage containers, rubberized asphalt, etc.), and use of whole tires for playground and reef construction. **Tires sent to an incinerator DO NOT count as recycling.**
 - 5 List the material.

The undersigned hereby certifies that the tonnages reported on this form are true and accurate. Records will be made available to the County for verification if requested.
